Possible Origins Of Psychopathy

Possibility #1: "IT'S NATURAL."

Psychopathy is a naturally occurring phenomenon. It is a set of characteristics which developed over time in a sub-set of Humanity as part of the evolutionary adaptation of our species to certain environmental conditions.

Possibility #2: "GOD DID IT."

Psychopathy was created by God, and psychopaths were put on Earth, alongside Human Beings, as a form of punishment, to torment Human Beings for reasons unknown.

Possibility #3: "WE DID IT TO OURSELVES."

Human Beings performed genetic manipulation upon a sub-set of our own species in the ancient past, inadvertently creating Psychopathy in the process.

Possibility #4: "SOMETHING ELSE DID IT."

Some other form of intelligence that is *NOT* Human created the condition of Psychopathy within a sub-set of Human Beings, either deliberately or inadvertently.
